

Signing in to the Canvas Student App

To submit student work with your smartphone, first download the Canvas Student app for iOS or Android.

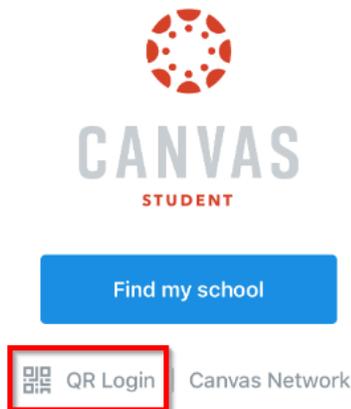

[Canvas Student for Android](#)

[Canvas Student for iOS](#)

[View the video version of this guide!](#)

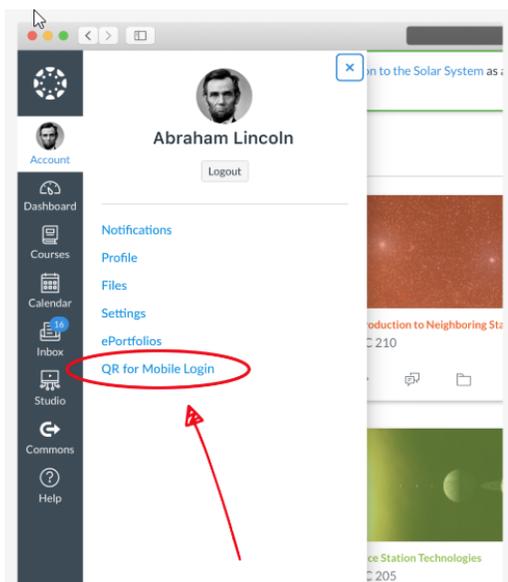

Once you have installed the Canvas Student app, locate it on your phone and launch it.

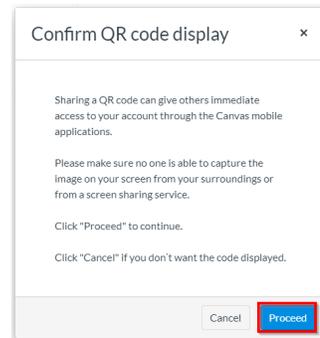

You will be brought to the login screen.

If you are already logged in on a laptop or desktop computer, logging in is easy! Simply click on the **QR Login** button.

If you do not have access to a computer that is logged in, click on Find my school and follow the procedure below to log in with your @gfsd.me student account.

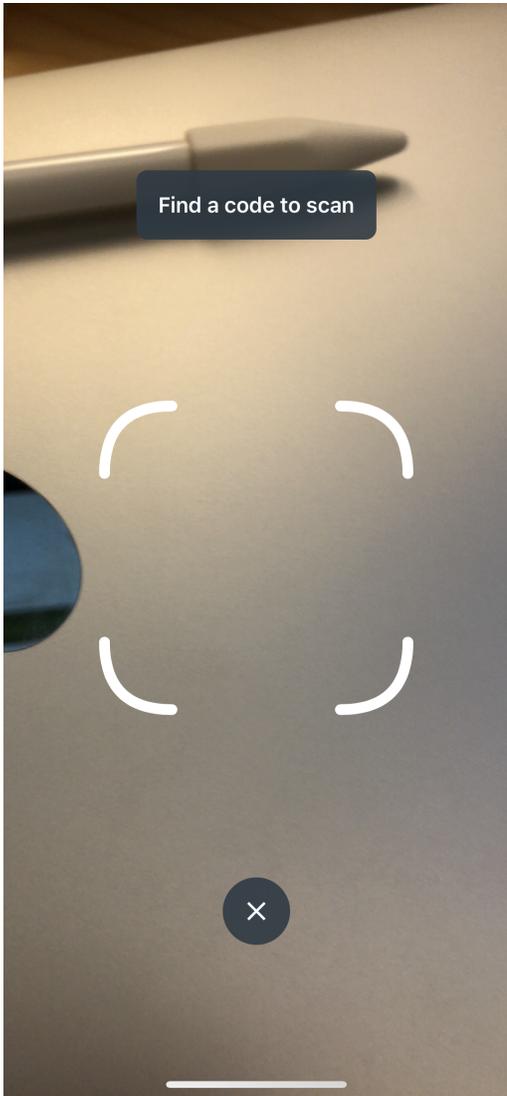

To get your QR code for Mobile login, click on **Account** and then on **QR for Mobile Login**

Click **Proceed** to confirm that you want to bring up the QR code.

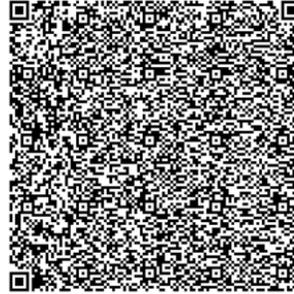

You never want to do this while sharing your screen on Zoom or while you are around people who might want to steal your password.

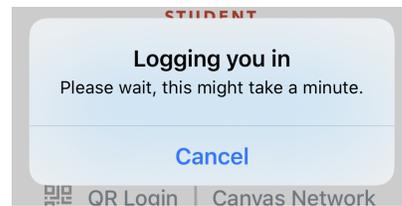

Aim your phone at the QR code on your screen. When your phone has successfully scanned the code, it will automatically log you in!

QR for Mobile Login

To log in to your Canvas account when you're on the go, scan this QR code from any Canvas mobile app.

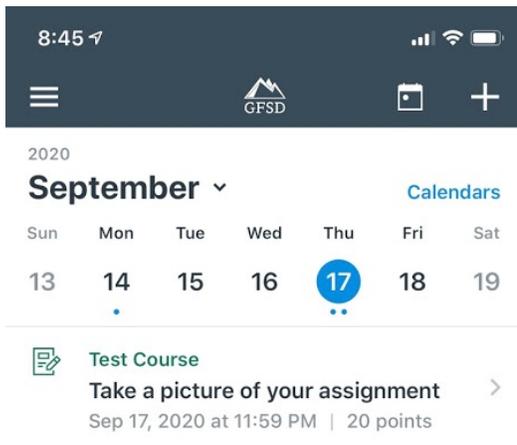

This code expires in 10 minutes.

Submitting Assignments using the Canvas Student App

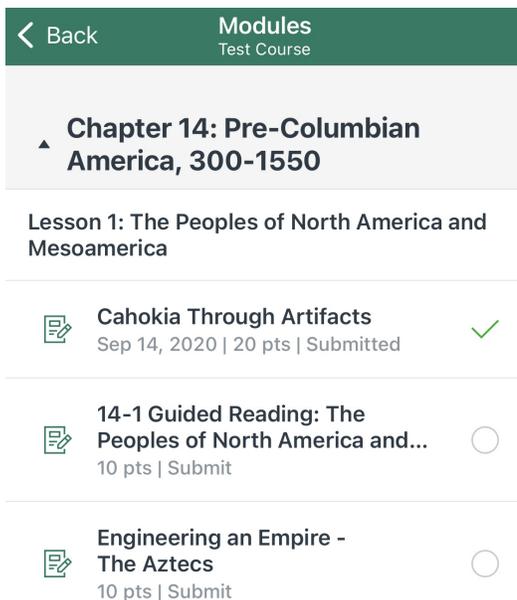

There are three ways to access a list of assignments in the Canvas Student app.

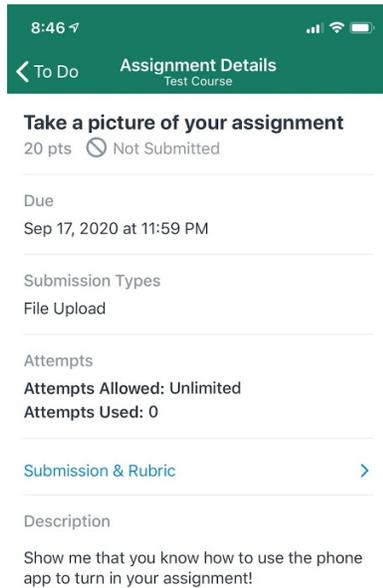

You can access your assignments by clicking on **Calendar**.

You can access your unsubmitted assignments through the **To Do** list.

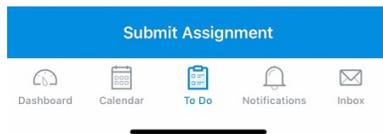

You can access all your assignments and lessons by navigating to the course **Modules** page (or course homepage if your instructor is using module view).

After clicking on the assignment, you will see the Assignment information page. This tells you the

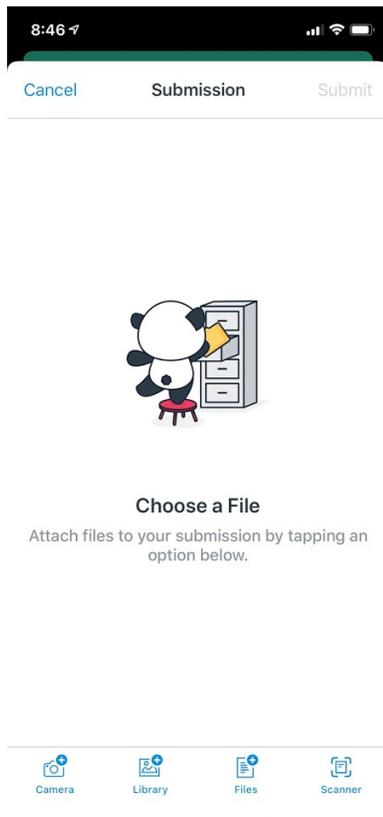

- due date
- the number of attempts allowed
- what you should turn in
- the description of what you need to accomplish

To begin submitting work, click on **Submit Assignment**.

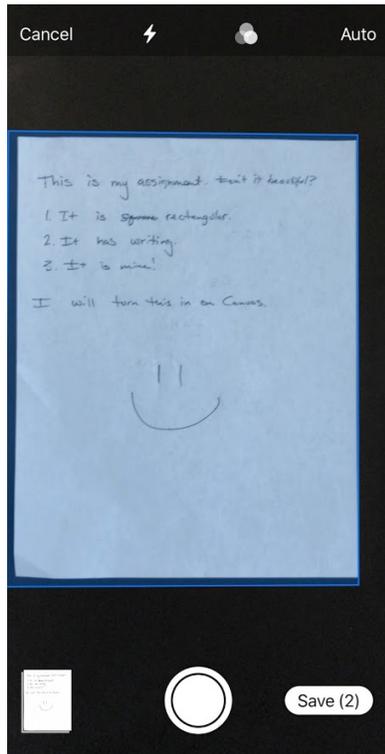

When you have clicked “Submit Assignment” you will see four options:

- **Camera** - take a photo of your assignment and submit it
- **Library** - pick a photo from your image library
- **Files** - pick a file from your phone’s files
- **Scanner** - use your phone’s camera to scan a document

In this example, we are going to select the **Scanner** option because it will automatically flatten and deskew the image of a page to make it more readable.

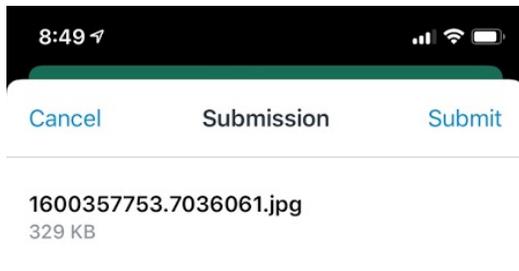

When you have selected Scanner, place your assignment flat on a table.

Raise the camera above the document until you can see all four corners of the sheet of paper.

A blue box will appear over the paper as the device detects the paper.

When the app has detected the paper, it will take a picture automatically. If it is having difficulty, you can press the round photo button to take a picture manually.

If you have more than one page to scan, you can move from one page to the next as soon as the picture is taken.

After you have finished scanning, Canvas Student will show you the number of pages you are submitting.

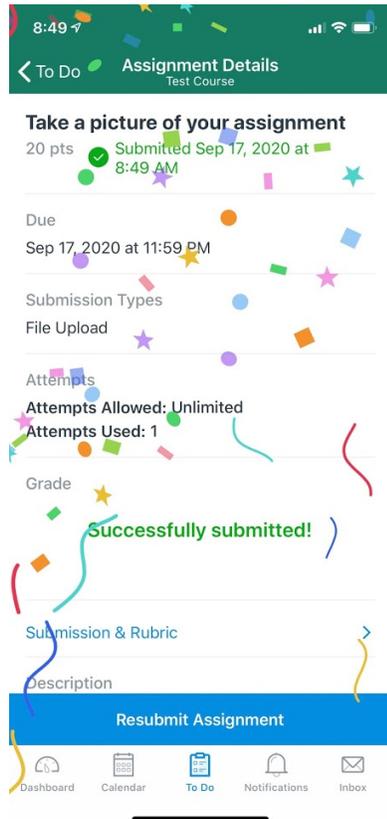

If everything looks right click **Submit** in the upper righthand corner!

Submission Uploading...

[Tap to view progress](#)

After you click submit, you will see "Submission Uploading..."

Do not leave this screen until the submission is complete.

When your submission has been made successfully, you will see “Successfully Submitted” and confetti!

This means your assignment was successfully sent to your teacher.
